PROFILE

Autodidact Frontend Developer specialized in Angular and TypeScript. Experience building modern web applications using Server-Side Rendering (SSR), REST API integration, authentication, and scalable architectures. I have developed 7 projects from scratch, including 3 professional-grade Angular applications focused on performance, user experience, and best practices. Passionate about continuous learning, problem-solving, and creating high-quality digital products.

HIGHLIGHTS

- ✓ 7 projects developed from scratch,
- ✓ Angular SSR & SEO optimization experience
- ✓ REST API & cloud services integration
- ✓ Modern & responsive interfaces with Tailwind CSS
- ✓ Scalable architecture & reusable components

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, RxJS

Tools: Git, GitHub, Docker, VS Code, Vitest, Supabase.

LANGUAGES

Spanish — Native

English — A2 (Elementary)

INTERESTS

Web Development, Programming, Soccer, Video Games, Movies & Series, Continuous Learning

ADDITIONAL INFO

Available for remote work

Open to Junior Frontend Developer roles

Repositories and projects available on GitHub

EXPERIENCE

Frontend Developer | Independent Projects (Apr 2026 – Present): Development of Angular applications with SSR integrating REST APIs, authentication, and scalable architectures.

- Creation of responsive and accessible interfaces using Tailwind CSS.
- Implementation of reusable components, services, guards, lazy loading, and Angular best practices.
- Integration of cloud services and data persistence systems.
- Optimization of performance, SEO, and user experience.
- Development of 4 projects with JavaScript during learning phase, evolving from DOM fundamentals to complete applications.

SELECTED PROJECTS

CineVerse

Technologies: Angular • TypeScript • TMDB API • Docker • Supabase

Description: Movie discovery platform with authentication, personalized lists, and cross-device synchronization. Advanced integration with the TMDB API via HttpClient, interceptors, and error handling. Data persistence and authentication using Supabase.

Portfolio

Technologies: Angular 21 • SSR • Tailwind CSS • TypeScript • Signals

Description: Professional portfolio developed with Angular 21 and Server-Side Rendering. Features modern architecture, scroll reveal animations, glassmorphism, lazy loading, and SEO optimization. Designed for maximum performance and UX.

EcoTaxis

Technologies: Angular • SSR • TypeScript • Tailwind CSS • Vitest

Description: Electric tricycle rental system for Viñales, Cuba. Includes advanced filters, reservations, and dynamic pricing. Optimized via Angular SSR for improved load speed and SEO ranking. Testing coverage via Vitest.

PROFESSIONAL QUOTE

“I am passionate about creating useful, accessible, and high-performance digital experiences. Always seeking to learn, improve, and add value to every project.”
